"Heated Granite Slab to be built in"

DESIGN

A sturdy stainless-steel support box with adjustable legs for leveling is topped by a granite serving surface. Thanks to Rotisol's unique patented system, heat is uniformly diffused across the entire surface of the granite slab. It is a very even heat, and there is no risk of cold patches. ROTISOL's Heated Granite Slabs can be installed in any counter and are available in Absolute Black or Grey Sarde (white with grey and black flecks).

FEATURES

- ROTISOL's Heated Granite Slabs are made of approved food safe material.
- Control panel is connected with a 40" power cord in a stainless-steel conduit so that it can be placed in the most convenient location.
- Heated fabric with embedded with heating elements uniformly spreads under the surface of the granite for accumulation and redistribution of the heat through the granite without any risk of cold spots.
- A thermostat controls the temperature through a probe inserted into the granite, allowing the temperature to be set from 145°F to 199°F. LOW CONSUMPTION / ENERGY SAVING!
